PERSONAL STATEMENT

Years of consecutive interpreting across medical, legal, banking and customer service settings have shown that the key to the job is not just glossaries and knowledge, but empathy, active listening, resourcefulness and proactiveness to solve the issues that arise when interpreting in real time, for real people, with real problems in the real world. Those same core values carry over even as the field changes. Now delving into executive assistance, building expertise in Claude Code and vibe coding, CRM with GoHighLevel and workflow automation, and ready to apply that same empathy, resourcefulness and initiative to support executives and teams.
